SEVENCs.COM

DATA

- Gain efficiency having one provider for both charts and PPU software
- Rapid installation of Official ENC's
- Compatibility with Web-Mapping-Services (WMS)
- GRIB overlays
- Implementation of web services

ROUTES

- Save time and use the integrated Import-functionality for routes
- Quick route creation due to touch screen optimized waypoint-handles
- Merge, copy, reverse routes
- 'Live' saving functionality of routes

DOCKING

- Docking Mode with transversal speed vectors and ROT
- 'Friendly Target' feature suppresses alarms and vectors for assisting tugs
- Distancelines to AIS targets, chart objects and fenderlines

3D

- 3D is not a game, make use of increased 'look ahead' without zooming.
- Increased situational awareness in complicated traffic situations

TIME PLANNING

- Calculate meeting points to other ships
- Check arrivals at points along your route

MANAGEMENT

- If you have a bigger group of users, organise your team via the management console
- Share files, push settings, backup data
